# we are spark
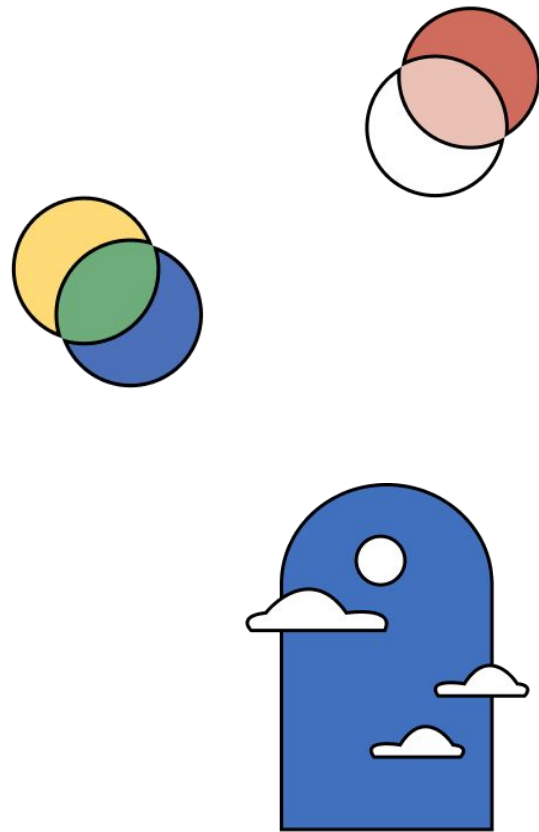

Spark is a **community** of student developers and designers at Penn who work together to build **creative and client-facing projects**.

# About Us

*Established in Spring 2021, Spark is a community of student designers and engineers at the University of Pennsylvania that bridge technology and design to build projects from ground-up. We're Penn's first student organization that specializes in product design in addition to coding.*
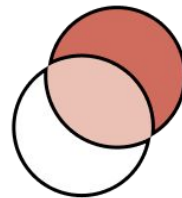

| Active Members | Completed Projects | Active Semesters |

| ~30 | 15 | 2 |

# Spark Red

**Spark Red** is the **projects branch** of Spark, as opposed to **Spark Blue**, our educational branch.
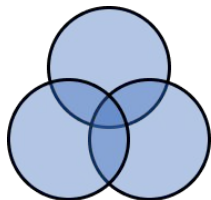

Red consists of **returning** and **experienced** members looking for interesting projects. All members have passed a technical assessment.

*Our projects are completed over the course of **one semester** and cost a **one-time fee of $250**, but let us know if this is difficult — we can work something out!*
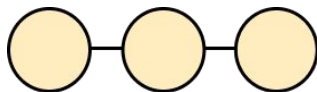

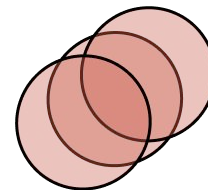

# Services We Offer

## *Web Development*

We offer web development projects across the full-stack, with both frontend and backend components. Spark Red members all are proficient in HTML/CSS/jS, React, and Django.

## *Product Design*

We offer product design services to help develop or redesign your product's user experience and interface. Spark Red designers are proficient in Figma.

## *TBD!*

If there are other services you need relating to technology or design, such as branding, marketing, or etc., please let us know and we can work something out!
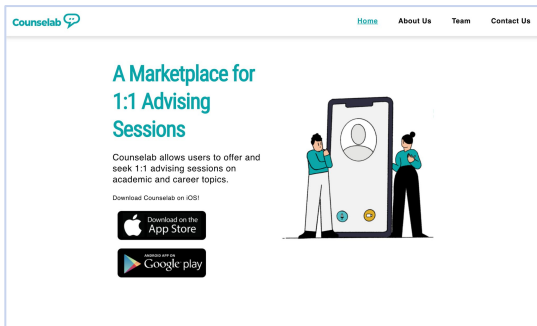

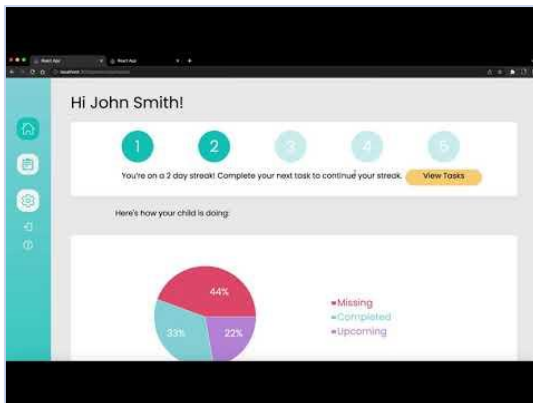

# Past Projects

### Frontend

Counselab (Fall 2021)
counselab.com

### Full-stack

Clarifi (Spring 2021, Fall 2021)

### Product and Branding Design

Bonfire (Fall 2021)
